

## Directions

1. Print the slide show **(starting at Slide 2)**
  - Print on reused paper if possible
2. Cut out each clipart/fact combination
3. Staple or pin onto your bulletin board (use a newspaper background)
4. Recycle all pieces you don't use
5. Recycle (or reuse) the bulletin board when you take it down

# EVERY DROP COUNTS

**'Water' you doing to help conserve?**

The average 5  
minute shower  
takes 15-25  
gallons of water

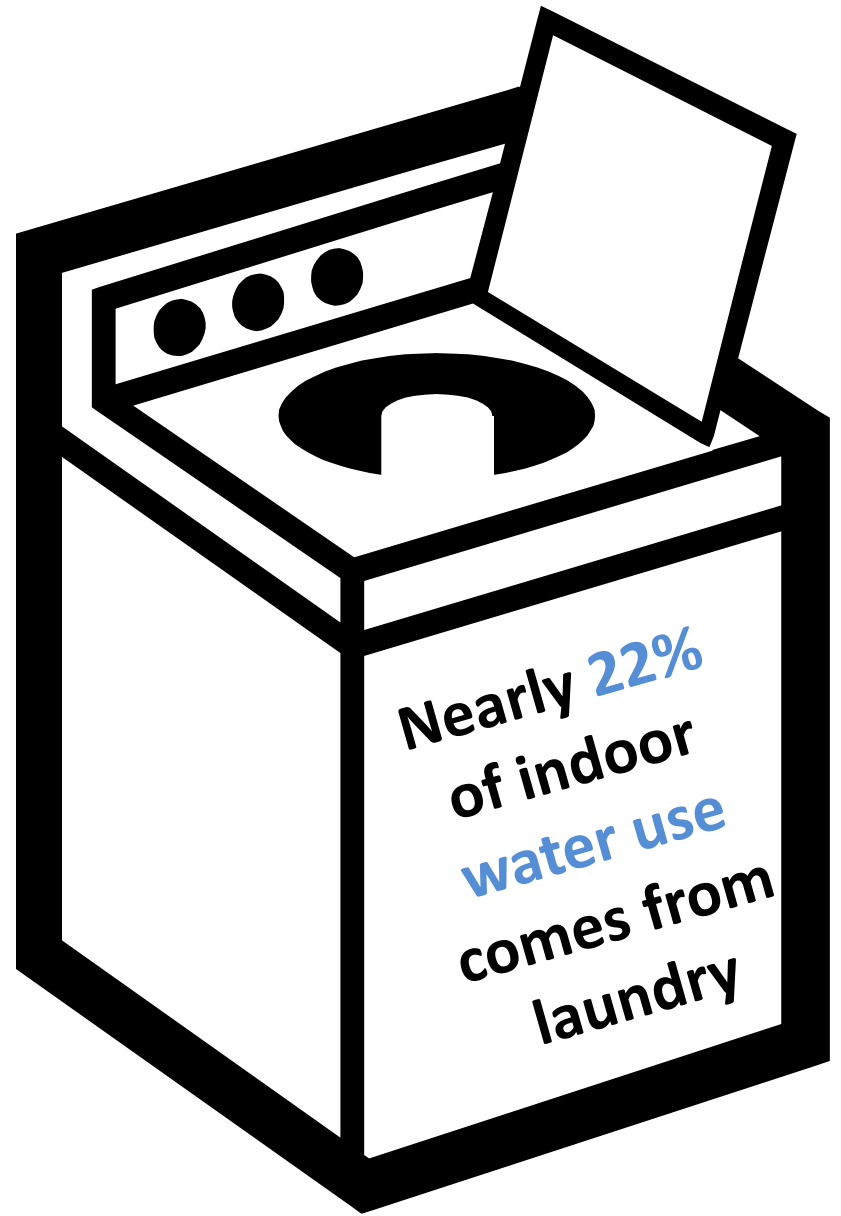

A dripping faucet can waste up to **2,000** gallons of water a year.

You use about **5 gallons** of water if you leave the water running while brushing your teeth.

The average American uses **approximately 100 gallons** of water per day

**70% of the Earth is covered with water but only about 1% of the world's water is readily available for human use.**

Every day in the United States, we  
drink about  
**110 million** gallons of water.

## What can you do?

- Shorten your shower by a couple minutes each day
- Don't use the toilet as a trash—bugs and tissues can go in the trash can
- If a faucet or shower head is leaking, report it immediately
- When doing laundry, make sure you have a full load of laundry

## **Reasons to Conserve Water**

- Water is life—humans can only live 3 days without water
- Helps meet future water demands
- Ensures a year round water supply
- Conserves energy
- Help save water ecosystems
